DETAILED ACTION

1. This Office action is in response to papers filed on 8/17/2009. Amendments made to the claims and Applicant's remarks have been entered and considered.
2. Claims 1, 3-8, 10-12 and 15-18 are allowed.

Reason for Allowance

3. The following is an examiner's statement of reasons for allowance: The primary reason for allowance is inclusion of features in claim 1 that "a tuning element, which acts upon the torsion element and serves for is configured to be fixed to the torsion rod at selectable positions along the torsion rod to mechanically tune the resonant frequency of the drive unit".

The examiner found three most relevant prior arts; Nishinaka et al (US 7328474, 2004/0010871) and Mackie (US 3430296) to combine with Brosens (US 4135119). Brosens teaches the claimed invention except the tuning element defined above. Nishinaka failed to teach hollow shaft having torsion rod inside but shows an element (12) for vibration damping which changes resonant frequency at selectable position. However, the element is not in fixed state. Mackie shows a torsion rod inside hollow shaft and element (5) which may change the resonant frequency fixed to the torsion rod but failed to teach the element is at selectable position. Nishinaka and Mackie are not combinable.

4. Claims 15-18 have been rejoined as claim 15, method of manufacturing, contains all limitations in claim 1 of apparatus.

Art Unit: 2834

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
